LECTURE | BAS SMETS

Bureau Bas Smets

Bas Smets has a background in landscape architecture, civil engineering and architecture. He founded his firm in Brussels in 2007 and has since completed projects in more than 12 countries with his team of twenty architects and landscape architects. Starting from a precise reading of the existing land, his projects reveal a landscape, visible yet unseen. These projects vary in scale from territorial visions to infrastructural landscapes, from large parks to private gardens, from city centres to film sets.
